ABOUT ME

Aspiring **Data Analyst** with a strong foundation in Python, SQL, Excel, and Data Visualization. Skilled in data cleaning, exploratory data analysis (EDA), dashboard creation, and transforming raw data into meaningful business insights. Passionate about solving business problems through data-driven decision-making and continuously improving analytical skills.

EDUCATION

Bachelor of Technology (Information Technology)

Dr. APJ Abdul Kalam Technical University

- Sep 2022 – Sep 2026 | CGPA : 6.79

Schooling

- High School (2020) | Percentage 80.16
- Intermediate (2022) | Percentage 76.8

PROJECTS

1. IPL Analytics Dashboard – Dashboard Type Analysis

Tech Stack: HTML, CSS, JavaScript, Chart.js, Data Visualization

- Developed a fully interactive IPL Analytics Dashboard (2008–2025) to analyse team performance, player statistics, season records and championship trends.
- Implemented dynamic data visualization including bar charts, line charts, timelines and statistical dashboard for real-time insights.
- Analysed IPL datasets to generate insights on top scorers, wicket takers, win percentage, Orange/Purple Cap winners and historical team performance.

2. Sales Data Analysis Dashboard

- Analysed sales data to identify top-performing products, regions and customers.
- Created interactive dashboard using Excel/Power BI to track KPIs and monthly trends.
- Provided actionable insights to improve sales strategies and revenue.
